FIRST AID KIT

PVC FIRST AID KIT
Having a first aid kit ready in your home can help prevent an injury from getting worse.

3 Tips for Buying a Reliable First-Aid Kit

Is the kit intended for Personal use or workplace?

Will it be purchase for personal, outdoor, home, Kitchen, E-hailing, office, or factory?

How many people will the kit be servicing?

this will dictate the size of your kit

How much space do you have to keep the kit?

Portable or keep in a fixed location Will it be kept in a backpack, sports bag, car, cupboard, office, truck, boat, factory or elsewhere?

TRAUMA BAG / FIRST AID BAG

When Looking At Buying A Kit Think About These Things

Intended Use or Activity

Is the activity that would cause injuries that require a Trauma Kit?

Consider the Storage Space and Material

The size and material of the bag also plays a significant role in its choice. It should be easy to clean, maintain and comfortably accommodates your items.

Your Skill Level

Do you know how to use the products and how to use them for the various injuries they are designed for?

AUTOMATED EXTERNAL DEFIBRILATOR

How To Choose the Right AED Device?

Cost of Ownership

Battery replacement intervals and costs, electrode pad replacement costs, and servicing costs

Ease of maintenance

Maintaining the AED should be as easy as possible

Ease of use

Clear voice prompt and minimal steps required to use the device, and fewer moving parts or accessories.

Read the warranty.

Be sure to find a unit where the warranty suits your requirements and be clear on what it does and does not cover, under what circumstances, and for what length of time.

DDU-120E
Lifeline Fully AED

DDU-100E
Lifeline Semi AED

Features & Benefits

- Simple, clear, and straightforward: Fully Automatic
- Saving lives, while rewarding, can be stressful. A calm voice leads the user through the rescue, clearly and concisely stating each instruction, one step at a time. Brightly lit progress lights provide clear visual text guidance to reinforce voice instructions.
- 7-year battery, unique in the industry, which will deliver 300 shocks or work continuously for 16 hours. High Battery Capacity-2800mAh
- Lightweight, fully integrated design with no lids or moving parts that would confuse or delay a rescue; a roomy handle big enough even for gloved hands, and rubberized surfaces to ensure a sure grip in an emergency.
- The actively illuminated status indicator shows unit readiness, to ensure that the unit is ready to perform anytime, everytime.
- "Locate the AED!" Time is of the essence in a rescue. The highly visible yellow color makes the unit easy to locate and deploy.
- Compact, portable and lightweight the Lifeline AED has won numerous awards for design and innovation. It was even displayed at the Museum of Modern Art in New York City as an example of innovative design!
- Extremely durable; manufactured to withstand dust and water ingress; tested to military standards for shock and vibration; jet aircraft and helicopter tested.

AUTOMATED EXTERNAL DEFIBRILATOR

AED ACCESSORIES

AED Pad

- Type: Adult & Child/Infant
- Intended use: Disposable
- Adhesion: Self-adhesive
- Active gel surface area: 103 cm² each (nominal)
- Cable / connector type: Integrated
- Cable length: 122 cm (typical)/23.07.2021
- Child/Infant Pad Application: Paediatric patients up to 8 years of age and less than 25Kg

AED Battery

The battery pack comes with a 9-volt lithium battery that tests the AED daily. Standard Capacity:

- Lasts up to 5 years in the Lifeline AED while in stand-by mode, can deliver up to 125 shocks, or 8 hours of continuous operating time.

High Capacity:

- 7-year battery, unique in the industry, which will deliver 300 shocks or work continuously for 16 hours.

WAT-M2B AED Cabinet

This well constructed high quality AED wall cabinet comes with an alarm & light.

- Stainless steel handle
- With alarm, strobe light & Lock
- Fit for all AED in the market

Dimension (LxWxH) = 40cm x 20cm x 36cm

Weight: 5Kg

Should you require further clarification or doubt on choosing a stretcher, kindly contact our Clinical Specialist, we will assist you accordingly.

HS-A002 Spine Board With 3 Speed Clip Straps

Commonly used in transporting injured or spine injury casualties and at the same time allow to immobilize. Made of high-density polyethylene.

Features and benefits

- **Water Rescue** - Able to float on the water, durable, light-weight
- **Textures** - Subtle and delicate surface which help to prevent slippage
- **Gripping and Balancing** - 21 oversized handhold holes
- **Designs** - 1 small hole for head immobiliser fixing
- **X-Ray Translucent** - Easy For Smooth Log-Rolls

Load Limit
160 kg

Weight
5 kg

Length
184 cm

Width
46 cm

Height
6 cm

HS-A003 Spine Board With 3 Speed Clip Straps

Floating capacity 65kg

Speed clip straps x 3

Commonly used in transporting injured or spine injury casualties and at the same time allow to immobilize. Made of high-density polyethylene.

Features and benefits

- **Water Rescue** - Able to float on the water, durable, light-weight
- **Textures** - Subtle and delicate surface which help to prevent slippage
- **Gripping and Balancing** - 21 oversized handhold holes
- **Designs** - 1 small hole for head immobiliser fixing

HS-D002 Multifunctional Ambulance Stretcher

Multifunctional ambulance stretcher that simple to operate and yet provide casualties safety by locking system and the buckle belt to secure the patient during transportation. It can be converted into a chair, the angle of stretcher can be adjusted according to your requirement.

Features and benefits

- With capability to convert into wheel chair.
- The backrest can be adjusted from 0-65 deg.
- Swing-down side rails to protect patient when transfer.
- The mechanical legs are controlled by right handle.
- Only one person can slide the stretcher on to the ambulance.
- The stretcher can be locked by the fixing device when it is in the ambulance.
- It's made of high-strength aluminum alloy
- Mainly used for ambulance, hospitals, emergency centers.

HS-D003 Premium Ambulance Stretcher

Premium ambulance stretcher is a heavy duty & durable ambulance stretcher that simple to operate and yet provide casualties safety by locking system and the buckle belt to secure the patient during transportation.

Features and benefits

- The bottom space for spine board storage.
- The height of loading wheels is adjustable to fit different height of ambulance board.
- The backrest can be adjusted from 0-65 degree by gas spring.
- Swing-down side rails to protect patient when transfer.
- The mechanical legs are controlled by the handles in both sides, there is a safety lever to control front and hind legs to fold while loading and prevent collapse while standing.
- Only one person can slide the stretcher on to the ambulance.
- The stretcher can be locked by the fixing device when it is in the ambulance.
- It's made of high-strength aluminium alloy
- Mainly used for ambulance, hospitals, emergency centres.

HS-D007 Basic Ambulance Stretcher

An ambulance stretcher that simple to operate and yet provide casualties safety by locking system and the buckle belt to secure the patient during transportation. It comes with an IV pole and hydraulic system of backrest.

Features and benefits

- **Cleanliness** - Easy to clean and disinfect
- **Comfort** - By adjusting the backrest via hydraulic system
- **Safety** - Side protections completely over tunable
- **Material** - Made of aluminium alloy and layered with waterproof cushion

HS-E003 Aluminium Scoop Stretcher

Foldable & Easy Storage

Mainly used to transfer fractured and seriously wounded casualties. The scoop stretcher can help to reduce further injury and allowing EMS personnel to easily transfer casualties without moving them on and off the stretcher.

Features and benefits

- **Easy Storage** - Able to split into two pieces, light-weight, easy to carry
- **Locking System** - Easy locking and unlocking designs which help during emergency situation
- **Sterilization** - Easy cleaning
- **Material** - Made of high-strength aluminum alloy

HS-E005 Premium PP Scoop Stretcher

Foldable & Easy Storage

Mainly used to transfer fractured and seriously wounded casualties. Use to immobilize casualties in position found to minimize further injury. Allows EMS personnel to easily transfer casualties without moving them on and off the stretcher.

Features and benefits

- **Easy Storage** - Able to split into 2 pieces, light-weight
- **Designs** - Head section is recessed to provide proper alignment of cervical, allow casualties spine to remain in the found position
- **X-Ray Translucent**
- **Sterilization** - Easy cleaning
- **Material** - Made of impact-resistant polyethylene plastic

HS-F001 Basket stretcher with Four Point Lifting Bridle

It is specially designed and it is essential equipment in search and rescue operation especially in confine area, mountain slopes or by helicopter rescuing.

Features and benefits

- **Comfort** - Foam mattress is place to promote better comfort
- **Four Point Lifting Bridle** - Ideal for helicopter rescuing
- **Easier Transportation** - Handholes for gripping
- **Material** - Made of high quality anti corrosion material, durable

HS-B018 Single Fold Stretcher

This is basic stretcher widely used by Paramedic, EMS Rescue Professional, Ambulance Service and other health care professional. Single fold stretcher is a lightweight stretcher and it built from strong and high-quality materials that allows it to withstand a high payload.

Features and benefits

- It is made of high strength aluminium alloy and waterproof leather materials.
- It is can be folded by lengthwise flexible handle and outrigger.
- It is characterized by it's being light weight, portable, easy to carry out and safe to use, etc.
- It is mainly used in carrying patients and wounded people for the hospitals, emergency centres and battle field.

IMMOBILIZER & SPLINT

IMMOBILIZATION & EXTRICATION

Prevent bone edges from moving and damaging other muscles, vessels or nerves and further complications.

Highlights

A splint is a rigid or flexible device used to protect, immobilize, or restrict motion in an injured part. A splint can be used for certain fractures, soft tissue sprains, tendon injuries, or injuries waiting for further treatment.

Should you require further clarification or doubt on choosing an immobilization equipment's, kindly contact our clinical specialist, we will assist you accordingly.

HS-L004A Adult Head Immobilizer

A head immobilizer is an ideal first aid equipment that can be used to immobilize casualties' head or neck during transportation with suspected spinal injury. Compatible to most of the spine board.

Features and benefits

- Emergency equipment designed to restrict the movement of the head or neck while transporting someone with a suspected spinal injury.
- Easy to apply and light weight.
- Unique head strap is designed to conform patient's forehead.
- Easy to clean and decontaminate between uses.
- Large ear holes for monitoring the patient.

HS-L006A Adjustable Cervical Collar Adult

HS-L006C Adjustable Cervical Collar
Child

Use to immobilize casualties neck and spinal cord by limiting the movement. Typically meant for short term use while recovering from injury, surgery or pain.

Features and benefits

- Ideal support for suspected cervical injury during emergency use.
- Provides a thorough fixation of the patient's head during transportation
- Prevents side, front and rear head deflection
- Succinct structure, easy to operate
- Soft interior makes the patient feel comfortable
- Adjustable 4 sizes
- Large spiracle for supervision carotid artery
- Compatible with spinal boards and head Immobilizers
- Adult Length: 56.8 cm
- Child Length: 43 cm

HS-L007A KED Kendrick Extrication Device

Suitable in transporting and immobilizing casualties out from confined spaces. X-ray and advanced life support can be performed with device in place. It provide ideal support of the spine, neck and head. Can be use on multiple sizes including children and pregnant women.

Features and benefits

- **Application** - Colour-coded sewn-in straps and snaplock buckles
- **Horizontal Flexibility** - Wrap around design
- **Easy Gripping** - Build-in handles
- **Designs** - Adjustable, can be use with hip and pelvic splint
- **Easy Access** - With fold-back sides permit easy access to chest

Product Specification

Size: 82 cm (L) x 80 cm (H)
Weight: 2.5 kg

HS-L008 Frac-Care Upper & Lower Limb Splint

It is a simple and affordable device that can be used to support injured part of casualties with suspected fracture before proper treatment is given. This device is not recommended for femur fracture with traction.

Features and benefits

- Application- Simple and fast
- X-Ray Translucent
- Sterilization- Easy cleaning
- Reusable
- Versatile- Can be used either on the left or right.

Package include:

- Upper Limb x 3 pcs
- Lower Limb x 3 pcs
- Soft Carrying Bag x 1 pc

HS-L009 Air Splint

It is a necessary first aid equipment that can be used during accidents whereby when casualties has crush or cut injuries. It helps in preventing surface bleeding without interrupting circulation and maintaining position of the injured part during transportation.

Features and benefits

- X-Ray Translucent- Allow x-ray to penetrate without removing
- Sterilization- Easy cleaning
- Reusable
- Material- Made of transparent PVC make it resistant against water and shifting weather condition

Package include:

- Upper Limb x 3 pcs
- Lower Limb x 3 pcs
- Hand Pump x 1 pc
- Soft Carrying Bag x 1 pc

HS-L012A Traction Splint-Adult

For trauma cases such as fracture of femur without involving injury of lower limb. The design of this device is to provide traction in casualties leg after suffering vascular or nerve damage or bone fractures. Simple mechanical traction enables EMS to apply the necessary traction with labelling on the straps.

Features and benefits

- **Quick Guide** - Wide elastic support straps with label
- **Sterilization** - Easy to clean and maintain
- **Designs** - Durable and length adjustable aluminium frame

HS-L010 Malleable Splint (Size: 91cm x 11cm)

Malleable splint is a simple and mouldable first aid pieces that suggested to be essential during emergency situation. It helps to immobilize injured

Features and benefits

- Compact- Small size, light-weight
- Application- Easy and simple to apply
- Reusable
- Designs- Mouldable, unaffected by heat, water and dirt
- Material- Made of soft, malleable strip coated with foam make it rigid after moulding in supporting injured parts

HS-L015A Tactical Tourniquet

Use to control massive extremity bleeding. It can be adjusted according to the bleeding, then able to prevent the muscular death. The injured can operate only by one hand, so that the self-saving efficiency can be improved.

Features and benefits

- Compact- Easy storage and light-weight
- Designs- No Velcro, safe-fixed screws, 1m strap to adjust the limbs
- Material- Aluminium rod, no Velcro design can prevent the loose under muddy or sandy environment

HS-L010B Malleable Splint (Size: 40cm x 11cm)

VFM-HS-FS Finger Splint

Finger splint is designed for an injury where the thin tendon that straightens the finger is damaged, this is commonly known as 'baseball finger'. This happens when an object hit or has a big impact on the tip of the finger and it bends more than it should.

Features and benefits

- Function in stabilizing the finger, control the movement of the joint in its normal range and decrease swelling
- Suitable for finger fracture, sprain, dislocation, straightening mallet finger.
- Made of aluminum and foam for comfort and proper support.
- Built-in strap to secure during application.
- Easy to apply and take off.
- Compact and light-weight.
- Easy assessment of blood flow to finger after apply.
- 3 pieces per set

Size S: 8.2cm (L) x 2.1cm (W)
Size M: 10.2cm (L) x 2.1cm (W)
Size L: 12.1cm (L) x 2.1cm (W)

CPR TRAINING AIDS

3 Things to consider when purchasing CPR Training Manikins

Do I do a lot of traveling when I train?

If you're doing a lot of onsite training that involves traveling to different locations, a smaller, lightweight manikin could be your best choice. Something easy to carry, easy to set up, and, most importantly, easy to clean will make your "road show" experience a little less stressful.

What is involved in using a particular manikin?

How easy is it to get those lungs in and out of your manikin? Can your manikin be safely used with your AED trainer unit's pads? Do you need a manikin with a removable face, nose, or mouthpiece?

Does the manikin offer feedback mechanisms?

Many models offer a feedback system such as indicator lights, click sound, QCPR to show when compressions and rescue breaths are being done correctly. Is that a feature that fits with your training style?

PRACTI-MAN
CPR TRAINING SOLUTIONS

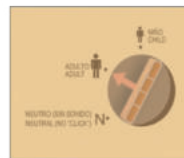

MB-001B(AD) Practi-Man Advance

Includes:
CPR Manikin
User manual
5x lungs and 2x valves
1x Head locking clips set (Left - right)

CPR MANIKIN PRACTI-BABY

Practi-Baby's size, weight and movements are suitable for performing correct infant CPR, adapting to training needs.

Excellent performance during practice with pediatric resuscitator. The head tilt enables students to learn the correct breathing technique.

AUDIBLE FEEDBACK

The selector gives the option of practice sessions with or without clicking.

GUEDEL AIRWAY

Pads do not leave residue on the skin.

GUEDEL AIRWAY

It allows the practice of a Guedel airway placement.

PP-AM-100M-MS PRESTAN Professional Adult Manikin with CPR Advisor

- Realistic looking and performing manikin is more acceptable to both instructors and students.
- Far easier and faster to carry and setup at training sites
- Patented face/head tilt simulates how an actual victim's head would move if he required CPR and teaches students how to properly open the airway
- Easily inserted face shield/ lung bag provides visual chest rise to ensure students receive the most accurate and realistic training
- Face shield is secured so it won't slip and there's no need for adhesives
- Prestan Manikins are not made with natural rubber latex
- Fully compliant with 2015 Guidelines

123-03050 Laerdal Little Anne QCPR

Little Anne QCPR allows an instructor to monitor up to six learners at the same time (using our QCPR Training app) or up to 42 learners (with QCPR Classroom) from the palm of their hand. The Little Anne QCPR Training and QCPR Classroom Apps provide an easy to view performance summary that highlight which students may require further guidance.

At a glance you can pick up who is not compressing deeply enough, who is not compressing at the correct rate and who is overventilating.

Life-like anatomy

Perform nose-pinch, head tilt, chin lift and jaw thrust to see chest rise. Anatomically correct oral and nasal passages.

Correct compression force

See and hear that compressions are done correctly. A built-in clicker signals when the correct compression depth is achieved.

Quick & easy maintenance

Clean-up is easy with disposable lungs and removable faces. Made with Laerdal's patented design and materials, it's built to last.

Mobile Phone is Not Included

133-01050 Laerdal Baby Anne QPCR

Baby Anne was developed to provide effective infant CPR training without compromising realism or quality of chest compressions and ventilation. The convenient packaging of four Baby Anne manikins makes hands-on practice affordable for every student.

Product benefits

- Educationally effective by offering all the essential features necessary for learning infant CPR
- Affordability allows increased hands-on practice
- Realistic chest compressions and chest rise allow students to learn proper techniques
- Logistically convenient lightweight and portable 4-pack weighs under 12.1 lb. making Baby Anne easy to transport
- Practical because it is inexpensive and easy to maintain
- Durable construction allows unequalled long-term use

Product features

- Oral and nasal passages allow realistic nose pinch required for mouth-to-nose ventilation
- Natural obstruction of the airway allows students to learn the important technique of opening the airway
- Airway closes during flexion and extension of the neck
- Head tilt/chin lift and jaw thrust allow students to practice correctly all maneuvers necessary when resuscitating a real patient
- Realistic chest compliance means students can experience the proper technique required for chest compressions on infants
- Foreign-body airway obstruction feature allows the release of a foreign-body obstruction to be practiced through back blows and chest-thrust techniques
- Economical disposable airways for quick and easy clean up
- Removable and reusable faces for convenient and affordable maintenance

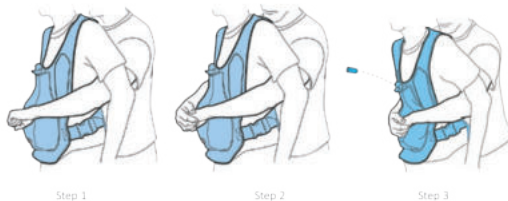

AF-101-B ActFast™ Anti Choking Trainer

The Act Fast Rescue Choking Vest is an invaluable tool for CPR instructors to easily and effectively teach students the correct way to perform the abdominal thrust maneuver (Heimlich) without using a manikin. The goal of Act Fast is to promote CPR education by making it more accessible and fun!

HOW IT WORKS

Operation:

1. Pull the vest on, cinch the waist belt and drop a foam plug into the 'airway'
2. Place your hands in the correct position, between the navel and rib cage
3. Deliver a quick, upward Abdominal Thrust Maneuver (Heimlich)
4. The Act Fast Anti Choking trainer can be used standing, sitting, on the ground or even for choking self-rescue by using a counter or chair

DCF-E350T-EN Defibtech AED Trainer for 100E

The standalone Trainer AED, model number DDU-100TR, is a dedicated training system used by AED training participants to learn how to be prepared for a sudden cardiac arrest (SCA) emergency. Training class participants are instructed in the use of an AED as part of a standard rescue protocol in the event someone suffers SCA.

It is externally similar to a fully-functional Defibtech DDU-100 Series Automated External Defibrillators (AEDs), known as the Lifeline AED and the Lifeline AUTO, in form and operation but all rubberized exterior surfaces are red over-molding, instead of black, to clearly distinguish the unit as a training device that cannot be used to defibrillate a real patient. The reusable training pads and rechargeable battery pack have red packaging and labels to distinguish them as being for training use only.

A remote control is provided with the Trainer AED. It allows the instructor to control training exercises from a distance. Trainer AEDs are factory programmed to function in Semi-Automatic mode, but can be configured with the remote control to operate in either Semi-Automatic or Fully Automatic mode. In addition, the remote control can be used to select from six representative training rescue scenarios.

Defibtech Lifeline AED Trainer Package includes:

- Defibtech Lifeline AED Trainer, Model # DDU-100TR.
- Lifeline AED trainer battery (rechargeable).
- Training battery charger.
- Defibtech AED trainer adult defibrillation training pads.
- Remote control.
- 6 pre-programmed training scenarios.
- User manual.
- Quick-use instruction card.

Specification

Power Supply: DC 4.5V/3*AA battery
 Product Size: 190*150*46mm
 Static Current: <200uA
 Maximum Current: <300mA
 Remote Control
 Power Supply: DC 3V/2*AAA battery
 Static Current: <5uA
 Maximum Current: <10mA

XFT-120C AED Trainer

XFT-120C is designed to prepare the emergency responder to use the clinical Automatic External Defibrillator (AED) in the emergency. This training unit provides a variety of pre-programmed training scenarios which simulates the realistic sudden cardiac arrest situation, which can help the emergency responders to get familiar with the operation of the clinical defibrillator.

- Compliant with AHA new guidelines, and pre-configured with 10 training scenarios that simulate realistic sudden cardiac arrest episodes.
- A metronome is added to the flashing lights when the unit is counting out the 2 minutes for CPR.
- It can be used with CPR Manikin, it can respond if the training pads connect firmly or not, can prompt whether the position of the electrode pads is ok.
- It includes the DC and AUDIO interfaces.
- It is bilingual: also has Remote Control function.
- There are FULLY and Semi auto scenarios selectable.

HS-L029B CPR Face Shield (36 Pcs/Roll)

- Act as a barrier during CPR while giving rescue breaths to casualties.
- Economical device.
- Compact - Easy storage, easy carried
- Designs: Zero water absorption, resistance to many solvents
- Material: Made of polyethylene thermoplastic

HS-A012 CPR Board

- Designs: Its shape allows the best adaption to casualties back and neck
- Light Weight: Easy to carry
- Easy cleaning and storage
- Material: Made of high-quality polyethylene

OXYGEN/RESUSCITATION

OXYGEN & RESUSCITATION

Prioritize the management of the airway for severely injured patient.

Highlights

Airway management is a critical component of every first responder's job. From clearing the airway of secretions to managing complex aspiration cases and assessing causes of respiratory distress, the right equipment is key.

Should you require further clarification or doubt on choosing an airway product, kindly contact our Clinical Specialist, we will assist you accordingly.

HS-L016SA Silicon Resuscitator- Adult (Airway 3,4,5)

Accessories

HS-L016SC Silicon Resuscitator- Child (Airway 1,2,3)

HS-L016SI Silicon Resuscitator- Infant (Airway 00,0,1)

This is silicon resuscitator enable Paramedic, EMS, Ambulance Service to facilitate assisted ventilation of casualties in pre-hospital, in-hospital and post-hospital care. Built in with pressure relieve valve and exhale port for PEEP or filter attachment.

Features and benefits

• Designs-

Adult: Resuscitator volume of 1650ml, pressure limiting valve of 60cm H2O and bag reservoir volume of 2000ml

Child/Infant: Resuscitator volume of 600ml, pressure limiting valve of 40cm H2O and bag reservoir volume of 1600ml

• Oropharyngeal airway are included

• **Material-** Latex-free high grade medical silicone

HS-L022 Oropharyngeal Airway 8's/ Set

Oropharyngeal airway is an airway adjunct use during emergency life-threatening situation to open the casualties airway. It comes in 8 different sizes from infant to adult, and are used commonly in pre-hospital emergency care. It is used for short term airway management.

Features and benefits

- **Content**- Various sizes with colour coding for options
- **Material**- Semi-rigid non-toxic polyethylene, recommended single use

HS-L026 Manual Suction Pump

Features and benefits

- It is an effective device use for rapid suction of liquids in the mouth and nose region for an adult.
- Can be powered by one hand.
- Portable, easy to carry around and light weight..
- Disposable container volume of 300ml, vacuum(max) of 450mmHg.
- Disposable container volume of 300ml.
- Vacuum (max) of 450mmHg.
- Weight: 0.27kg

FIRST AID CONSUMABLES

FIRST AID CONSUMABLES

Proper first aid supplies able to minimize the risk of infection.

We offer wide range of first aid supplies for refill your first aid kit. With a regularly scheduled first aid service keeping you stocked with supplies, you'll be more prepared for any illnesses and injuries.

Should you require further clarification or doubt on choosing first aid supplies, kindly contact our Clinical Specialist, we will assist you accordingly.

VFM-PM-CB50 Crepe Bandage 5cm x 5m
VFM-PM-CB75 Crepe Bandage 7.5cm x 5m

- Hospital Quality
- Standard first aid bandage
- Stretchy, cotton, delicate woven bandage
- Used as a compression wrap for sports wound and sprains or to cover an injury dressing

Packing: 1 roll per pack

VFM-PM-EB50 Elastic Bandage 5cm x 5m

- Stretchable cotton bandage
- Used to create localized pressure and support
- Commonly used during sprains / strains

Packing: 1 roll per pack

VFM-PM-WOW25 W.O.W. Bandage 2.5cm x 5.5m
VFM-PM-WOW50 W.O.W. Bandage 5cm x 5.5m
VFM-PM-WOW75 W.O.W. Bandage 7.5cm x 5.5m

- Used to secure dressing on wound
- Allow air to ventilate through even though is covered
- Absorbent material to prevent excess moist
- Lighter but heavy duty
- Comes in individual packaging

Packing: 1pc per pack

VFM-PM-GS50 Non Sterile Gauze Swab 5cm x 5cm
VFM-PM-GS75 Non Sterile Gauze Swab 7.5cm x 7.5cm

- Gauze swab is made of highly absorbent cotton
- Gauze swab helps to stop bleeding from minor injury
- Ideal for wound clean and prepare wounds for dressing, medical use, dental use and beauty use
- Autoclavable

Specification: 8ply, Mesh 24x20

Packing: 100pcs per pack

VFM-PM-SGP50 Sterile Gauze Pad 5cm x 5cm
VFM-PM-SGP75 Sterile Gauze Pad 7.5cm x 7.5cm
VFM-PM-SGP100 Sterile Gauze Pad 10cm x 10cm

- Sterile Gauze Swab treats small to medium cuts, burns, scrapes, and other wounds
- It used to stop bleeding and keep wounds clean
- It also protects the area from dirt and debris that can cause wounds to get infected

Specification: 8ply, Mesh 24x20

Packing: 1pc per pack

VFM-SM-NA100

Sterile Non-Adherent Pad 10cm x 10cm

- Highly absorbent without adhering to the wound
- Provides cushioning protection for cuts, scrapes and burns
- Ease of removal helps minimize trauma to the wound site
- For best results: clean and dry wound before applying pad, change dressing as needed

Packing: 1pc per pack

VFM-PM-SCB10 Sterile Cotton Ball 10pcs

- Packed in sterile packaging
- Useful for cleaning wounds such as minor cuts and laceration

Packing: 10pc per pack

Weight: 5g per pack

VFM-PM-TB Triangular Bandage

Sizes: 91 x 91 x 127 cm

- Suitable for support, elevation and immobilization
- Uses as a sling for fractures, sprains and strains
- Can be used in or outside of hospital / during emergency
- Easy storage, foldable

VFM-SM-LD7 Sterile Finger Dressing No: 7 (Finger), 7.5cm x 5cm

VFM-SM-LD8 Sterile Lint Dressing No: 8 (Hand), 10cm x 7.5cm

VFM-SM-LD9 Sterile Lint Dressing No: 9 (Leg), 14.5cm x 10.5cm

VFM-SM-LD13 Sterile Wound Dressing No: 13 (Small) (Hand), 10cm x 8cm

VFM-SM-LD14 Sterile Wound Dressing No: 14 (Medium) (Leg), 15.5cm x 11.5cm
